BUILT TO PERFORM.
BUILT TO LAST.

MOULDER RETURN SYSTEM

**AUTOMATIC RETURN. MORE PRODUCTION.
NO OPERATOR BEHIND THE MOULDER.**

The LM Moulder Return Conveyor automatically transfers mouldings out of a moulder and returns the stock back to the operator loading the moulder—eliminating the need for an operator behind the moulder.

LABOR SAVINGS
Eliminates the need
for an operator
behind the moulder.

**INCREASED
PRODUCTION**
Longer, uninterrupted
production runs.

ACCURATE RETURNS
Photo eye actuated
transfer system for
precise operation.

ERGONOMIC DESIGN
Returns stock to the
operator for safer,
easier loading.

WORK PIECE DIMENSIONS (STANDARD VERSION)

LENGTH: 36" Min. – 192" Max.
(Optional 8' • 12' • 16')

WIDTH: 3/4" Min. – 9" Max.

THICKNESS: 3/8" Min. – 2" Max.

FEED SPEEDS: 20 – 120 FPM

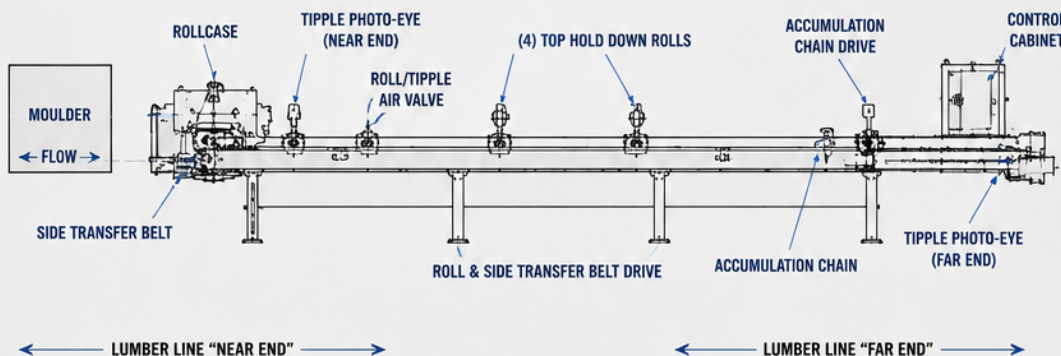

MOULDER RETURN SYSTEM FEATURES

- ✓ Handles stock lengths from 12" to 192"
- ✓ Photo eye actuated side rake, side transfer poly belts and a smooth top return belt conveyor.
- ✓ Quick width and thickness setup.
- ✓ Stock is returned onto an accumulation table (provided by customer).
- ✓ Works on both large and small profiles.
- ✓ Return belt conveyor can be reversed to feed to opposite end of the system.

SMOOTH FLOW. RELIABLE RETURNS.

Designed to keep your
moulder running and
your operator in the
most productive
position.

NOTE:
When stock is pulled
from side of machine
the accumulation
rails are removed
and an end stop is
mounted.

BUILT IN OREGON.
BACKED BY EXPERIENCE.
